

How to swap GNY Mainnet Tokens to GNY ERC20 Tokens

1. Log in to your GNY Web Wallet at <https://wallet.gny.io/#/login> by entering your twelve word GNY passphrase.

Please note that the GNY Web Wallet is currently optimised for desktop viewing only.

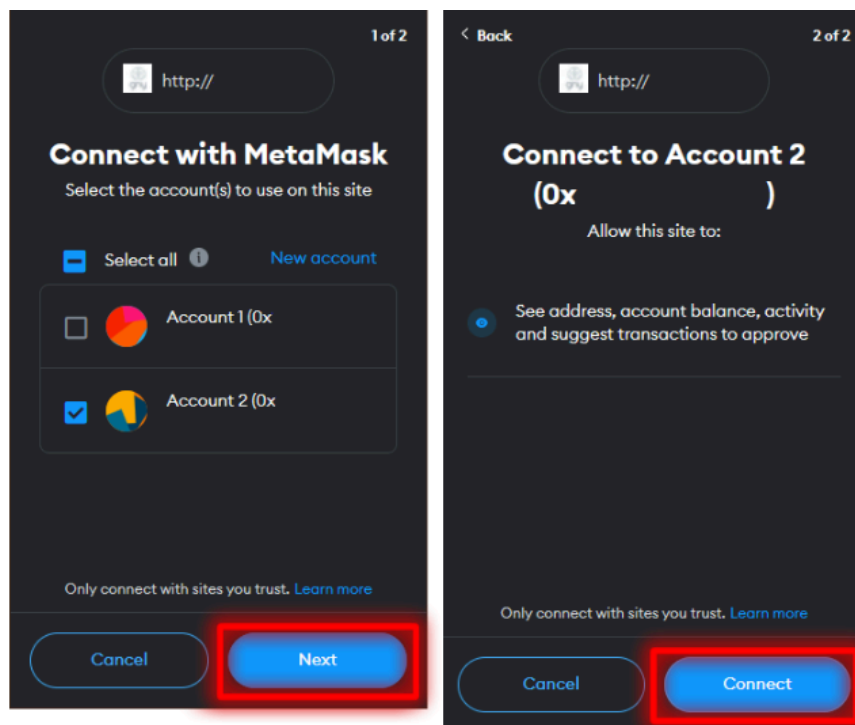

2. Log in to your Metamask wallet. Ensure the network you are connected to is the "Ethereum Mainnet"

3. In the GNY Web Wallet, click on the **Swap Mainnet to ETH** button. This will bring up a MetaMask Information message in the Web Wallet stating that “You are not connected to MetaMask!” Click on the **Connect to MetaMask** button beneath this message.

Your MetaMask interface will then display a “Connect with Metamask” screen. If you have multiple accounts, it will ask you to select which one you wish to connect with. Select only one account, then click **Next**. In the follow up screen, click **Connect**.

4. Check your GNY Web Wallet, and you will see that it has updated with the details of your GNY Mainnet Account Address and the ETH wallet address you have connected to. Satisfy yourself that they are both your selected wallet addresses.

Mainnet Account

Address: 63XXXXXXXXXXXXXXXXXXXXXX

Total Balance:

ETH Account

Currently connected to ETH wallet: 0xXXXXXXXXXXXXXXXXXXXXXX

MetaMask GNY ERC20 balance:

Swap from Mainnet to ETH

* Amount

5. Enter the amount of GNY Mainnet tokens you wish to swap into the "Amount" field, and then click the **Swap** button.

Mainnet Account

Address: 63XXXXXXXXXXXXXXXXXXXXX

Total Balance:

ETH Account

Currently connected to ETH wallet: 0XXXXXXXXXXXXXXXXXXXXX

MetaMask GNY ERC20 balance:

Swap from Mainnet to ETH

* Amount

300

Swap

Refresh

This will trigger a confirmation bubble to pop up. Read it carefully. Then click the **Swap** button within the pop up if you are sure you wish to swap the stated number of GNY tokens for the stated fee.

Warning

×

Are you certain you wish to swap "1000" GNY from the Mainnet to your ERC20 compatible wallet "0XXXXXXXXXXXXXXXXXXXXX"? There will be a fee of 500 GNY for the swap.

!

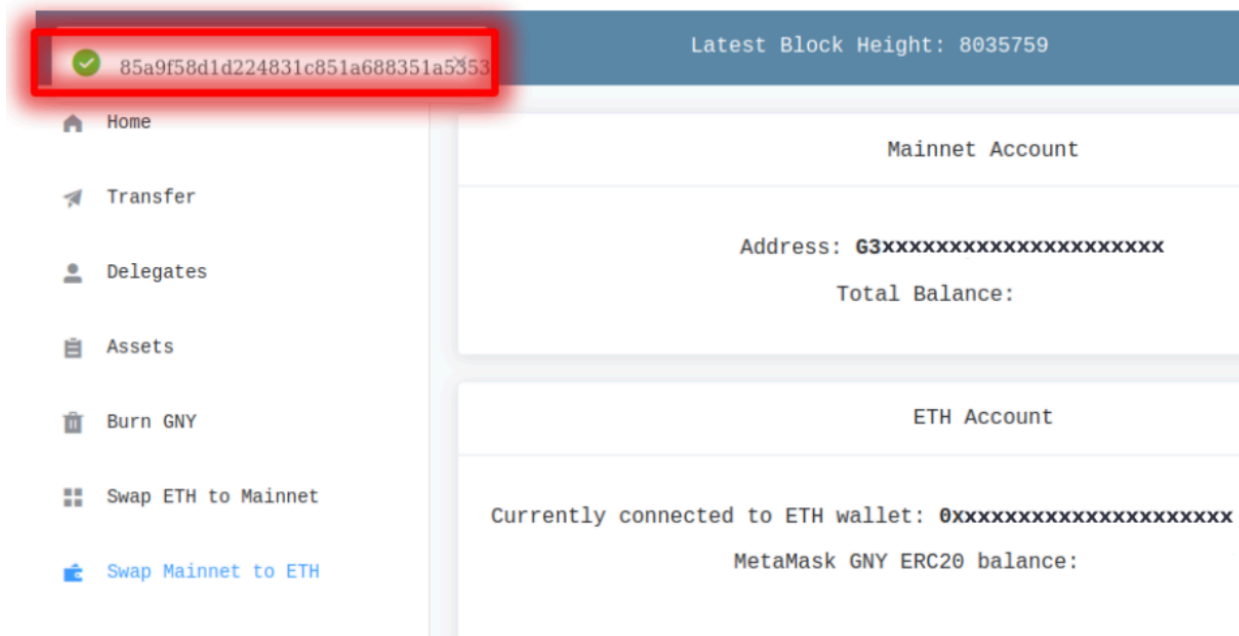

If the current ETH gas fees are comparable to the 500 GNY fee, your GNY ERC20 tokens should arrive in your wallet within 10 minutes.

However, if ETH gas fees are high at the time you initiate the swap, you may need to wait for up to 20 hours for your GNY ERC20 tokens to arrive in your wallet.

Swap

6. The identifying code for your swap transaction will soon appear in the top left corner of your GNY Web wallet interface. After approximately 10 minutes, revisit and refresh your MetaMask wallet. If the Eth gas fees at the time you initiated the swap were comparable to the 500 GNY swap fee, you will find your GNY ERC20 tokens have arrived in your wallet.

However, if Eth gas fees were high at the time you initiated the swap, you may need to wait for up to 20 hours for Eth fees to settle enough to allow your GNY ERC20 tokens to arrive in your wallet. For further insight into Eth gas fee fluctuations, you may find <https://etherscan.io/gastracker> helpful.

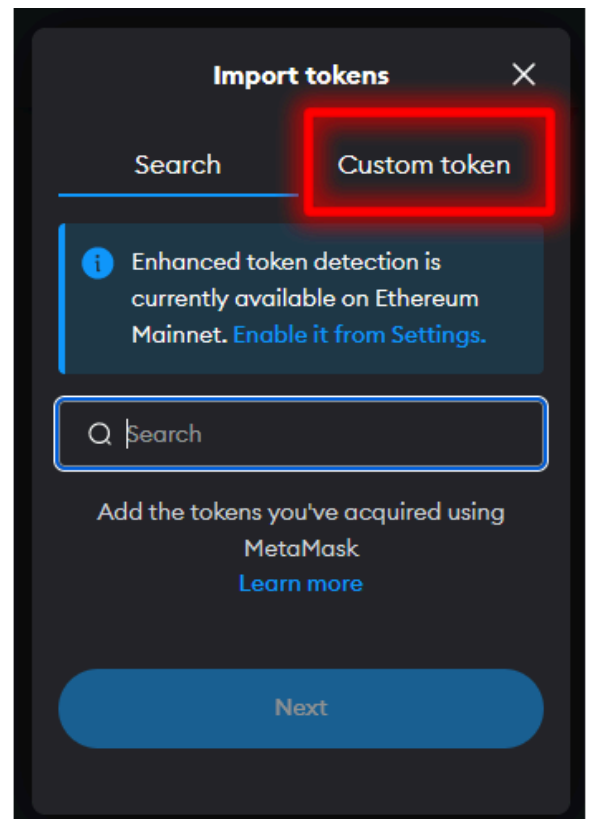

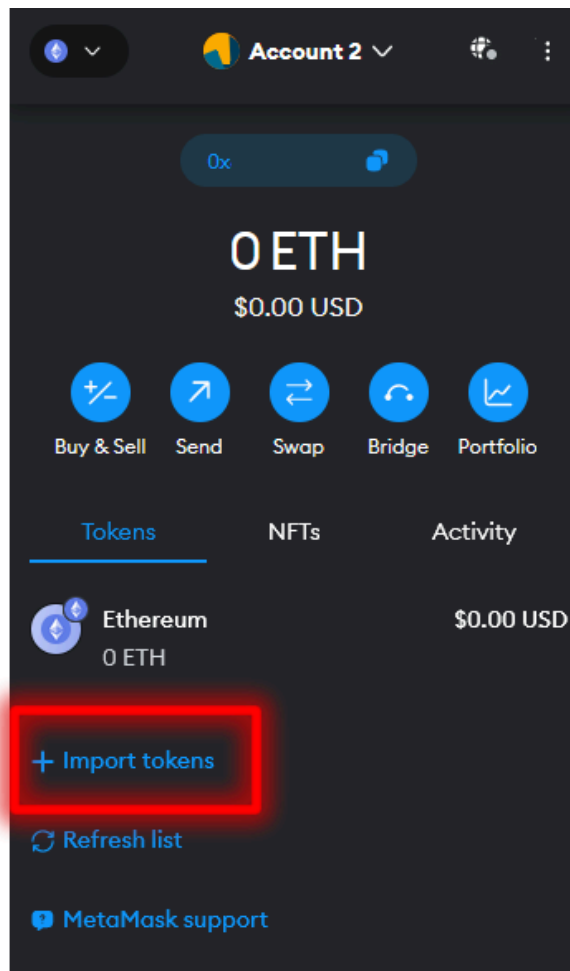

Should you require support with the GNY Swapgate utility then you can open a support ticket here: <https://gny.freshdesk.com/support/home>

Please note that if you have never previously held GNY ERC-20 tokens in your MetaMask wallet, then the tokens may not show in the assets list after the swap, even though they are safely in the wallet. You may have to configure your MetaMask wallet to allow the GNY ERC-20 tokens to appear in your token list. A tutorial for this is included below.

Configuring the Metamask wallet to show GNY ERC20 tokens

1. Within the “Tokens” section of your Metamask interface, click the **Import tokens** button. Within the subsequent screen, click the **Custom token** button

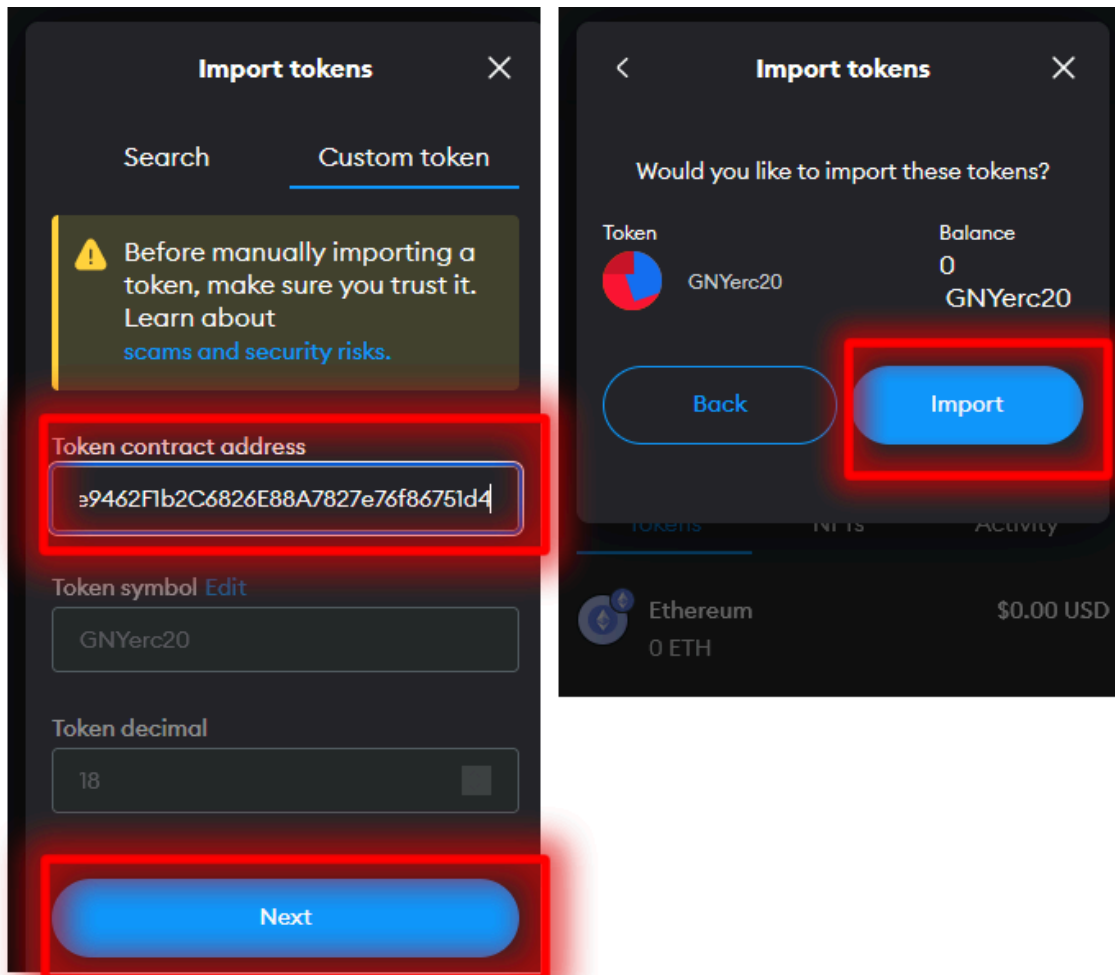

2. Within the “Custom token” screen, fill the blank “Token Contract Address” field with the GNY ERC20 contract address:

0xb1f871Ae9462F1b2C6826E88A7827e76f86751d4

The “Token symbol” (GNYerc20) and “Token Decimal” (18) fields should automatically populate themselves.

Click the **Next** button.

A confirmation screen will appear, allowing you to click the **Import** button.

3. A screen similar to the one shown below will appear to confirm that your Metamask wallet is now ready to display GNY ERC20 tokens.
